

The only UK manufacturer of Aluminium Composite, Multipanel UK provide a range of rigid panels whose versatility and hygienic, easy to clean surfaces make them ideal for fabricating cabinets and casings, cladding surfaces and creating screens and partitions

- ◆ Screens & Partitions
- ◆ Cabinets and casings
- ◆ Walls & work surfaces
- ◆ Hand-washing/sanitation stations
- ◆ Custom Dry Erase Whiteboards
- ◆ Trolley construction
- ◆ Sign making
- ◆ Way finding
- ◆ Hospital bed panels

UK Head Office +44 (0)1304 831 319 • USA Office +1 718 841 9940

Internationally recognised products that are perfect for a multitude of applications including cabinet and medical trolley construction, screens, partitions and highly effective signage/way finding solutions

- ◆ Clean easy-peel protective film
- ◆ UV flatbed printable
- ◆ Flat, smooth, uniform surface
- ◆ Easy to clean, resistant to detergents ≤10 pH
- ◆ UV resistant for outdoor use
- ◆ Rigid, lightweight panel
- ◆ EN13501-1, REACH, RoHS certified

Premium quality composite panels made from aluminium composite materials featuring two aluminium sheets sandwiching a polyethylene core, available in one of the widest colour ranges on the market.

The panel for fabrication

Easily fabricated and folded ◆ 5 year guarantee

Skin (mm)	Panel Thickness (mm)	Sheet Sizes (mm)
0.30	2, 3, 4, 6	1220 x 2440/3050, 1250 x 2500/3050, 1500 x 3050/4050, 2050 x 3050/4050

Excellent Print Panel

Signal White Digital Finish ◆ 2 year guarantee

Skin (mm)	Panel Thickness (mm)	Sheet Sizes (mm)
0.22	2, 3, 4, 6	1220 x 2440/3050, 1250 x 2500/3050, 1500 x 3050/4050, 2050 x 3050/4050

Superb for flat applications

Wide range of colours ◆ 2 year guarantee

Skin (mm)	Panel Thickness (mm)	Sheet Sizes (mm)
0.20	2, 3, 4	1220 x 2440, 1250 x 2500, 1500 x 3050/4050, 2000 x 3050/4050

Perfect for short-term projects

Signal White ◆ 1 year guarantee

Skin (mm)	Panel Thickness (mm)	Sheet Sizes (mm)
0.15	2, 3	1220 x 2440, 1500 x 3050

galvanised steel composite sheets

Dual-sided Steel Composite

Magnetically receptive ◆ 5 year guarantee

Skin (mm)	Panel Thickness (mm)	Sheet Sizes (mm)
0.25	3, 6	1220 x 2440/3050

Ideal for whiteboards, Multishield is a dual-sided steel composite material that can be fabricated and is receptive to magnetic media.

- ◆ Magnetically receptive surface
- ◆ Choice of digital coating or Dry erase finish
- ◆ Can be fabricated
- ◆ Strong and durable

Used in conjunction with flexible magnetic print material, a Multishield surface allows visual graphics to be changed with ease. Such a system gives more flexibility as graphics can be effortlessly updated by rolling off the old and rolling on the new, transforming information displays easily without the need for hanging frames or hard fixings. After removal, graphics can be conveniently stored or sent to other sites for re-use.

Both sides of the panel have a flat, smooth, uniform surface, one side with a digital coating to help produce vibrant, colour-fast prints and the other side with a dry erase coating - great for whiteboards in the likes of hospitals and educational spaces.
